

MISLEAD

AMERICA'S SECRET EPIDEMIC

You and a guest are invited by Friends of the Earth to a free focus group rough-cut screening in Berkeley of *MisLEAD: America's Secret Epidemic*. **Seating may be limited** so RSVP by simply replying to this e-mail.

The question on many minds today: what is the source of the sudden, alarming rise in the number of American children with ADD, ADHD & Autism Spectrum symptoms—expensive disorders that create challenges for families and cost our society more than \$50,000,000,000 annually? *MisLEAD: America's Secret Epidemic* is the first documentary film that undertakes an intellectually rigorous, emotionally compelling and illuminating inquiry into a hidden epidemic that impacts one in three American children today. Tamara Rubin, an Oregon mother whose children were poisoned, travels the country talking with parents and top experts across many fields—uncovering surprising answers.

The screening will be followed by a Q&A with director Tamara Rubin, FOE campaigner Marcie Keverer, and Dr. Suruchi Chandra, a board certified holistic psychiatrist. Light refreshments will be served.

When: Sunday October 6th at 6pm

Where: The David Brower Center 2150 Allston Way Berkeley, CA (one block from Downtown Berkeley Bart Station, bike racks available as well)

When: To RSVP simply reply to this e-mail or contact Kris Marchu at kmarchu@foe.org
